

Updated documents for IFS Broker 3.2

25.09.2024

We are excited to share two updated publications that will help you prepare for the IFS Broker 3.2 Audit. Discover the essential information and valuable insights they contain.

The IFS Broker Guideline

This guideline is designed to assist internal and IFS auditors in conducting audits and gaining a better understanding of the IFS Broker Requirements, including their purpose and background. It contains audit questions, documentation notes, and practical advice. The guideline has been updated to version 3.2, and its layout has been refreshed.

The IFS Broker 3.2 Audit Protocol for Remote Auditing

This document is meant for certification bodies and auditors who are conducting an IFS Broker Audit using remote ICT. Certified companies can refer to this document to comprehend the process and get ready for the remote audit. We have revised this protocol to be in line with version 3.2 of the IFS Broker Standard and accreditation requirements (IAF MD1:2023).

The remote option is voluntary and must be agreed upon well in advance between the certification body and the company subject to IFS Broker Certification. Our broker fact sheet provides a brief overview of the [remote audit option](#).

Download the Documents
